Date: 27-01-2021

Dear Parents,

Greetings from Vydehi!

It is an exciting phase in your wards life to be starting medical school. Stepping away from the comfort of the home gives them a taste of the real world they will soon encounter. For those who feel apprehensive or feel that independent housing is better, here are some great reasons for them to stay in the hostel.

Due to the COVID19 pandemic, one year curriculum is being compressed into the short span of 9 months. To ensure that we complete the curriculum within the given time, we will not only be starting classes earlier in the day but also introducing evening classes. If students are on campus, they will be able to better endure the accelerated curriculum that we have structured for this year. In addition, students will have extra time to study instead of commuting. Our college has the necessary infrastructure to provide hostel accommodation for every student.

Vydehi takes great pride in the safety of its students. First of all, we want to make it mandatory to stay in the hostel in this COVID pandemic as the risk of being infected is much lesser if all students are in one place. This also ensures that your ward's friends, family and grandparents stay safe. Please be assured that we have daily screening and temperature checks for our employees. Furthermore, we have implemented a biometric system for entry and exit from the hostel to give greater peace of mind to the parents. New wireless cameras have been placed in the hallways and entrance for additional security.

Being a medical student means more independence, new challenges, ability for time management, and most importantly, responsibility. This includes simple day to day things such as daily household tasks and finding time to study. Hostel life will teach your ward the important lessons of life and help them to become a responsible adult who can stand on their own feet.

Students will meet so many diverse people in their term at the hostel. Many of them will be friend each other and have new experiences. They will be exposed to a plethora of new thoughts and ideas. It helps to build overall character.

However, a few students are exempted for the following reasons:

1. On medical grounds.
2. Whose parents are residing in and around the college at a radius of 10 kilometers from the college.

We look forward to your commitment in helping us groom your ward into a medical professional.

With Warmest Regards,

DEAN
